The Company's registered office is in Calgary, Alberta at 400, 604 – 1st Street SW.

COPL and its subsidiaries are involved in the identification, acquisition, exploration and development of oil and natural gas offshore reserves. As at June 30, 2016, the Company has the following subsidiaries, all of which are wholly-owned directly or indirectly:

- COPL Technical Services Limited, which is involved in providing technical services to the COPL group of companies;
- Canadian Overseas Petroleum (UK) Limited ("COPL UK"), which conducts the Company's operations in the United Kingdom ("UK");

Both partners hold a 50% interest in the joint venture.

2. BASIS OF PREPARATION AND GOING CONCERN

Basis of Preparation and Compliance
The Company's unaudited condensed interim consolidated financial statements ("financial statements") have been prepared in accordance with International Accounting Standard ("IAS") 34, "Interim Financial Reporting" following acceptable accounting policies under International Financial Reporting Standards ("IFRS") and are reported in thousands of United States dollars ("$"). The Company's financial statements should be read in conjunction with the Company's audited annual consolidated financial statements as at and for the years ended December 31, 2015 and 2014, which outline the Company's significant accounting policies in Note 3 thereto, which have been applied consistently in these financial statements, as well as the Company's critical accounting judgments and key sources of estimation uncertainty which are also set out in Note 3 thereto.

Going Concern
These financial statements are prepared on a going concern basis which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business.

Currently, the Company does not have material cash inflows and/or adequate financing to develop profitable operations. The Company is pursuing exploration projects and contracts that will require substantial additional financing before they are able to generate positive operating cash flows. Accordingly, the Company's continued successful operations are dependent on its ability to obtain additional financing. There is no assurance that the Company will be able to obtain adequate financing in the future or that such financing will be obtained on terms advantageous to the Company. With no assurance such financing will be obtained in future, there may be significant doubt the Company will be able to continue as a going concern. These financial statements do not give effect to adjustments that would be necessary to the carrying values and classifications of assets and liabilities should the Company be unable to continue as a going concern.

The financial statements were authorized for issue by the Company's Board of Directors on August 11, 2016.

Cash	**$ 5,131**	$ 1,928
Credit card deposits	**92**	87

The fair value of cash and cash equivalents was $5.2 million as at June 30, 2016 ($2.0 million as at December 31, 2015). The Company deposits its cash with reputable Canadian and Bermuda banks. The Company did not have any overdraft facilities in place as at June 30, 2016 and December 31, 2015.

4. INVESTMENT IN JOINT VENTURE

The Company currently holds a 50% interest in a jointly controlled entity, ShoreCan, focusing on acquisitions of upstream oil and gas exploration, development and producing assets in sub-Saharan Africa. The determination of ShoreCan as a joint venture was based on ShoreCan's structure through a separate legal entity whereby neither the legal form nor the contractual arrangement give the owners rights to the assets and obligations for the liabilities within the normal course of business, nor does it give the rights to the economic benefits of the assets or responsibility for settling liabilities associated with the arrangement.

The Company and its joint venture partner signed a funding agreement, effective October 24, 2014 (the "Funding Agreement") providing financial support as needed in proportion to its interest (50% each) in ShoreCan for ShoreCan's expenses and obligations. Amounts advanced to ShoreCan under the terms of the Funding Agreement are unsecured and payable on or before October 24, 2017 contingent upon ShoreCan generating its own cashflows. Interest is charged monthly at an annual rate of 3.0% above USD 12 months LIBOR.

On February 20, 2015, ShoreCan entered into a commercial acquisition, ratified by the Ministry of Energy in Namibia, of an 80% interest in three blocks offshore Namibia. The blocks are defined as 1708, 1709 and 1808.

On August 17, 2015 ShoreCan agreed to an acquisition in Nigeria subject to the approvals of the Nigerian regulatory authorities whereby ShoreCan acquires 80% of the issued share capital of a company with 100% of the equity in and titled interest to an oil appraisal and development project offering near term oil production. The transaction also provides that ShoreCan will take over management and operatorship of the asset. Should the transaction not complete, there is no financial penalty to the Company and any obligations under the transaction agreements will terminate.

In the event that the acquisition of seismic data does not occur in accordance with the work programme, there is no financial penalty to ShoreCan and the license is subject to forfeiture after that date. The Company uses the following hierarchy for determining and disclosing the fair value of financial instruments depending on the observability of the inputs employed in the measurement:

Level 1: fair value measurements are based on unadjusted quoted prices in active markets for identical assets or liabilities. An active market for an asset or liability is considered to be a market where transactions occur with sufficient frequency and volume to provide pricing information on an ongoing basis. At June 30, 2016, cash and cash equivalents, are valued using Level 1 inputs.

Level 2: fair value measurements are based on valuation models and techniques where the significant inputs are derived from quoted indices. Level 2 valuations are based on inputs including quoted forward prices, time value, volatility factors and broker quotes that can be observed or corroborated in the market for the entire duration of the derivative instrument. At June 30, 2016, the derivative liability is valued using Level 2 inputs.

Level 3: fair value measurements are based on unobservable information or where the observable data does not support a significant portion of the instrument’s fair value.
