

## COPL Receives Gas Flaring Approval for Barron Flats Shannon Unit

---

**London, United Kingdom; Calgary, Canada: October 12, 2022** – Canadian Overseas Petroleum Limited and its affiliates (“COPL” or the “Company”) (XOP: CSE) & (COPL: LSE), an international oil and gas exploration, production and development company, with production and development operations focused in Converse and Natrona Counties, Wyoming, USA, is pleased to announce the Wyoming Oil and Gas Conservation Commission (“WOGCC”) at a Hearing (the “Hearing”) held in Casper Wyoming on October 11, 2022 granted the application by Company’s affiliate Southwestern Production to temporarily flare additional gas volumes at its operated 85% WI Barron Flats Shannon Unit (“BFSU”).

**Arthur Millholland, President and CEO commented** “This is a great result as it will allow the Company to manage increased gas production with associated high working pressures as the miscible bank moves in the injection patterns. In addition, our oil production from the Shannon Unit will increase as production rates have been restricted in certain wells due to these issues. The gas flaring is temporary, as we plan to debottleneck the gas gathering system in the coming months by first tying in two flowing wells directly to our gas plant followed by staged upgrades to our gas gathering system.”

Southwestern’s submission to the Hearing has been uploaded to COPL’s website and can be viewed via the following link: <https://www.canoverseas.com/wp-content/uploads/2022/10/WOGCC-DOCKET-775-2022-Exhibits.pdf>.

### About the Company:

COPL is an international oil and gas exploration, development and production company actively pursuing opportunities in the United States with operations in Converse and Natrona Counties Wyoming, and in sub-Saharan Africa through its ShoreCan joint venture company in Nigeria, and independently in other countries.
