

Conversion of Bonds

London, United Kingdom; Calgary, Canada: November 4, 2022 – Canadian Overseas Petroleum Limited (“COPL” or the “Company”) (XOP: CSE) & (COPL: LSE), an international oil and gas exploration, production and development company with production and development operations focused in Converse and Natrona Counties, Wyoming, USA, has issued 6,996,500 common shares (the “Shares”) pursuant to a conversion of \$800,000 principal of 2024 Bonds and \$600,000 principal of 2025 Bonds.

Following these conversions, a total of seven 2024 Bonds and eighteen 2025 Bonds have been converted into Shares. The principal amount of convertible bonds outstanding has reduced to \$11.2 million of 2024 Bonds and \$9.0 million of 2025 Bonds.

Applications will be made to the FCA for these shares to be admitted to the Official List and to the London Stock Exchange for the Shares to be admitted to trading on the London Stock Exchange's main market for listed securities within the next twelve months, in accordance with Listing Rule 14.3.4. Following this issue of Shares the Company has a total of 275,331,966 common shares issued and outstanding. There are no Common Shares held in treasury and therefore the total number of voting rights in the Company is 275,331,966. This figure may be used by shareholders in the Company as the denominator for the calculations by which they will determine if they are required to notify their interest in, or a change to their interest in, the share capital of the Company under the Financial Conduct Authority's Disclosure Guidance and Transparency Rules.

About the Company:

COPL is an international oil and gas exploration, development and production company actively pursuing opportunities in the United States with operations in Converse County Wyoming, and in sub-Saharan Africa through its ShoreCan joint venture company in Nigeria, and independently in other countries.

The Company's Wyoming operations are one of the most environmentally responsible with minimal gas flaring and methane emissions combined with electricity sourced from a neighbouring wind farm to power production facilities.
